(a) condition number
κ, null space (Jacobi)
κ, augmented (Ruiz)
first captured IPM iteration
middle captured IPM iteration
last captured IPM iteration
(b) walk steps at ε = 0.3
shifted Chebyshev, null space
odd polynomial, augmented
below the line: null space cheaper
(c) classical Krylov work
MINRES (augmented) / CG (null space) iterations
KKT dimension N
dense_kappa
dense_noeq
sparse_banded
sparse_lowfill
sparse_scale
